

OpenText Content Cloud integrations for Microsoft

Enhance processes, drive productivity, and ensure secure and governed content

Benefits

- Bridge information silos
- Improve business processes
- Strengthen governance
- Maximize investments in Microsoft tools

Knowledge workers are often overwhelmed with a deluge of information, tangled workflows, and disconnected document systems spread across numerous business applications. This unmanaged content can lead to governance gaps, cybersecurity risks, and compliance headaches.

While Microsoft 365® is popular for productivity and collaboration, businesses often need additional tools to complement its features and keep everything running smoothly.

Break down information barriers to improve processes

OpenText™ Content Cloud integrations for Microsoft allow you to connect your key business applications to streamline information flow. This ensures you get the right information faster and in the right context, boosting productivity. With low-code development, you can quickly set up new processes and automate tasks across different apps.
