# Top 5 reasons to manage your information in the cloud

OpenText Core Signature and OpenText Core Case Management

For companies that need secure, instant access to information, OpenText™ Core Content Management is a cloud-based Software as a Service (SaaS) solution that delivers the right information to the right people—regardless of where they're working. Unlike other content services platforms, OpenText Core Content Management is easy to use, quick to deploy, and simple to configure and manage.

Here are 5 reasons to manage information in the cloud with OpenText Core Content Management:

1 **Get up and running quicker:** OpenText Core Content Management is a fast-deploying SaaS solution that delivers cloud-based content management with minimal IT involvement and provides automatic, regularly scheduled updates.

2 **Reduce application costs:** Eliminate the need to maintain multiple content management applications and free up valuable IT resources with a comprehensive solution that addresses the full information lifecycle.

3 **Say goodbye to content chaos:** OpenText Core Content Management integrates directly into leading business applications such as SAP S/4HANA® Public and Private Cloud, Salesforce®, and Microsoft 365® to accelerate business processes and enhance governance.

4 **Stop switching between applications:** Get a 360-degree view of content and related processes within a single interface to allow users to remain in familiar business applications, boosting employee productivity and engagement.

5 **Mitigate risk effectively:** OpenText Core Content Management allows organizations to instantly locate and re-use the right information and regulatory content to comply with ever-evolving compliance mandates and guidelines, such as GDPR.
